

WCRC General Secretary Search

Lead the Global Reformed Family: Apply to be the Next General Secretary of the WCRC

The World Communion of Reformed Churches (WCRC) is searching for a committed, compassionate, and visionary leader to serve as its next **General Secretary**.

With a global fellowship of **100 million Christians across more than 230 churches in 107 countries**, the WCRC is a participatory and prophetic koinonia, united in **communion and justice**. Rooted in the mission of John 10:10—so that all may have life—the WCRC engages in transformative work through:

- **Cultivating a just communion**
- **Covenanting for justice**
- **Doing theology for transformation**
- **Engaging God's mission in times of crisis**
- **Collaborating with ecumenical and global partners**

The Opportunity to Lead

The **General Secretary** serves as the chief executive officer, guiding the WCRC's vision, strengthening its common witness, and fostering relationships within the global Reformed family and the wider ecumenical movement. This is a unique opportunity to **inspire, connect, and lead**—working alongside a dynamic team in Hannover (Germany), regional leaders, and hundreds of dedicated volunteers worldwide.

The Ideal Candidate

We seek a leader who brings talents in communication, community-building, discernment, fundraising, leadership, listening, and organizational management. The successful candidate will:

- Be a member in good standing of a WCRC member church
- Be fluent in English (additional languages are an asset)
- Hold theological training, including an advanced degree
- Have proven leadership and management experience
- Demonstrate pastoral and cultural sensitivity
- Provide spiritual and strategic leadership to a global community

Application Process

Interested candidates should submit their applications by **30 April 2025** to gs-search@wrc.eu. Join us in shaping the future of the global Reformed communion—so that all may have life!

For more information, details of the job description and how to apply, see the application package.
